## EDUCATION

- **University of Pennsylvania** Philadelphia, PA  
*Master of Science in Computer and Information Science, GPA: 3.81/4.0* Aug 2019 - May 2021
  - **Coursework:** OS, Networked Systems, Analysis of Algorithms, Internet & Web Systems, Advanced Machine Perception, Comp. Linguistics, Computer Vision, Machine Learning. **Teaching Assistant:** CIS-581: Computer Vision
- **Cluster Innovation Center, University of Delhi,** New Delhi, India  
*Bachelor of Technology in Computer Science and Applied Mathematics, GPA: 8.2/10* Aug. 2013 - July 2017
  - **Minor:** Computational Biology

## EXPERIENCE

- **Amazon, Packaging Innovation** Seattle, WA  
*Software Development Engineer* Jul 2021 - Present
  - Implemented, tested, and deployed a packaging automation feature to enable shipping packages in vendor provided containers. The initiative is projected to generate Amazon **\$280 million** in annualized savings towards packaging, transportation and labor cost in **16** fulfillment centers across **NA & EU**. (*Java*)
  - Built UI based alarm component for a Packaging Decision Orchestration tool **helping Data Scientists** run data extraction and transformation jobs without interacting with complex code configurations. (*Python*)
  - Added functionality to create, clone and monitor custom SageMaker jobs in a React based image labeling platform that handles **100,000 images** worth of traffic **per day**. (*Typescript, React*)
  - Leveraged **Failure Mode Assessment** research to identify and influence critical code changes that were in flight. This prevented propagation of a failure mode to software that calibrates logistics for shipments. (*Java*)
  - Experienced **On-call**, Amazon FTE trained **interviewer**, on-boarding **mentor** for new SDEs.
- **University of Pennsylvania** Philadelphia, PA  
*Graduate Research Assistant* May 2020 - Dec 2020
  - **Multimodal Question Answering framework:** Worked on **intersection of NLP and Computer Vision**. Developed a novel task framework for Goal-Step inference, Step membership inference using multimodal Wikihow data. (*PyTorch*)
- **ESRI** New Delhi, India  
*Software Developer* May 2019 - July 2019
  - **ArcGIS Python API:** Developed framework for Multispectral (**near infrared**) support for Pixel classification in **ArcGIS** Python API. Developed Pyramid scene parsing backbone support of **object segmentation** for the API. (*PyTorch*)
  - **Spatial Dataframes:** Optimized validation checks in `arcgis.geometry` package using pre-compiled Cython binaries. This processes **0.1 million** entries in less than **2 ms**, which earlier took **45-55 ms**. (*Python, Cython*)
- **IIIT Delhi** New Delhi, India  
*Research Software Engineer, Full-time* Feb 2018 - March 2019
  - **Article:** Mourya, S., Kant, S., Kumar, P., Gupta, A. and Gupta, R., 2018. LeukoNet: DCT-based **CNN** architecture for the classification of **normal versus Leukemic** blasts in B-ALL Cancer.
  - **Accepted Challenge:** Classification of Normal versus Malignant Cells in B-ALL White Blood Cancer Microscopic Images, challenge selected at IEEE ISBI '19, Venice, Italy. (*Python, PyTorch*)
- **Predible Health** Bangalore, India  
*Software Developer* August 2017 - December 2017
  - **Development:** Developed **U-Net** based framework for Lung nodule segmentation from 3D CT scans. Also developed classifiers to analyze nodule level malignancy and emphysema. Built POC for identifying cancerous lung nodules from Radiomics data. Streamlined prototyping and testing via parallelization of the data pre-processing pipeline. (*Python*)
- **Google Summer of Code** Portland State University  
*Software Developer Intern* May 2016 - August 2016
  - **Cyvlfeat:** Designed and developed 12 new features for a **high-performance** Python/Cython wrapper of a computer vision library, VLFeat. Emulated the wrapper from **MATLAB MEX** scripts.

## SKILLS

- **Software:** Java, React, Mockito, EasyMock, C, P4, AWS: (Lambda, DynamoDB, Cloudwatch, EMR, SQS, SNS, CDK, IAM, CodePipeline, Step Functions, API Gateway, Glue), Apache: (Spark, Storm, Bench), Jenkins
- **Research:** Python, PyTorch, FastAI, Keras, Scikit-Learn, Cython, Python/C API, MATLAB
- **Accepted Talks:** *Scientific Computing using Cython: Best of both worlds!* - EuroScipy '18, Europython '17, Pycon India '17

## SOFTWARE PROJECTS

- **Penn OS:** Built a user-level UNIX-like operating system consisting of a kernel, scheduler, FAT based file-system and shell. Built a SIGALARM - based priority scheduler for context switching (using `ucontext` library) and a Shell with job control, `stdin/out` redirection and other builtins like `sleep`, `kill`, `ps` etc. Also handled Shell's integration with kernel. (*C*)
- **Penn MMU:** Implemented an in-memory simulation of the Memory Management Unit and Page Replacement. Designed and implemented from scratch, Memory Allocation, Page Tables, Page Replacement Algorithms and Translation Lookaside Buffer. (*C*)
- **Search Engine:** Built a scalable web search engine hosted on Amazon AWS complete with a **crawler**, **indexer**, **pagerank**, and a front end. Worked majorly on developing a **TF-IDF** and **Map-Reduce** based scalable **Indexer**. (*Java*)
